Brief description

The **CIM** male connector series is available in 5 mm (.197 in), 7.5 mm (.295 in) and 10 mm (.394 in) metric pitches and in 5.08 mm (.200 in), 7.62 mm (.300 in) and 10.16 mm (.400 in) Imperial pitches, in monolithic blocks from 2 to 25 poles, in side-stackable, modular or polarized versions or with locking screw flanges. It is possible to connect the relative female parallel to the PCB, inclined at 45°, overturned at 270° or vertical in relation to the board.

The **CIM** connector series for PCBs is characterized by an asymmetric profile, so mistakes are prevented when connections are made with the relative **CIF** or **CVF** with screw connection to the wire or **CGF** soldered to the board. Further safety when connecting can be obtained by using the **CIF-LC1** and **CIM-SCI** coding splines and coding clips (see page 20-21)

or **COF-SP1** polarization pegs (see page 18-19).

It is possible to side-stack or assemble the basic modular connectors in order to obtain any number of poles without losing the pitch. By taking advantage of this particular characteristic a minimum stock of basic connectors can be kept.

It is simple to manage the product, the warehouse and the assembly with the Kit packages because several versions can be received with only one code, the part-numbers are significantly reduced and the risk of making mistakes is also reduced
