How to Order
1500 Series terminal blocks are ordered by listing a composite number made up of the model designation in which the last two digits indicate the number of poles required for the application. Example: A 1500 10-terminal block (3/8" centers) becomes stock number 1510.
Suffixes are used as follows:
  ST denotes double solder lug
  3/4ST denotes single solder lug
  Y denotes printed circuit pin
  YWY feed-thru wire wrap
  W wire clamp
The 1510 described above, with double solder lug mounting on 3/8" centers thus converts to stock number 1510-ST. To specify quick-connect terminals, simply add the style number required. (See accessories.) May be purchased factory-assembled or as customer-installed accessory.
Features:
- Flexible Hi-Temp Thermoplastic Terminal Blocks – Self-extinguishing types which resist breakage and other damage (conform to UL94V-0).
- Terminal Flexibility – Ideal for surface mount, sub-panel or chassis connections in electronic/electrical circuit applications. One thru 26 terminals.

TERMINAL JUMPER CONNECTS
Brass jumper connects 12 consecutive terminals and can be cut for shorter applications. Part No. 271-A72
Type 275-A16 is designed to connect two adjacent terminals of WT and WTC assemblies.
  - Part No. 275-A16

Tracks
Features:
  - STURDY TRACK – constructed of heavy steel with zinc-dichromate plating. Mounting holes are 7/32 inch diameter and provided continuously on 3/8 inch center-to-center spacing (SW Series) and 7/16 inch centers (W Series). DIN mounting holes are slots .248" wide by .709" long on .984" center-to-center spacing.
  - ECONOMICAL STANDARD LENGTHS – mounting track available in three and six-foot pre-cut lengths for self-cutting to application needs. DIN track available in two meter (78.74") lengths.
  - PRE-CUT TRACK – available for large volume work where identical lengths are used. Save cutting time in your plant.
  - SW, DSW, W AND DW SERIES COMPATIBILITY – track accommodates both W and SW Series of snap-in track type modules with any combination of terminal assemblies, fuse blocks, etc. DIN track accommodates DW and DSW Series modules.

How to Order
When ordering non-DIN track to a specified size, simply designate model followed by length required, expressed in poles. Example: SW with space for 24 poles plus two mounting holes becomes stock number SW-24. For standard three and six foot lengths, simply designate model followed by 96 or 192 respectively (SW Series) or 82/164 (W Series). Examples: SW-96 or SW-192; W-82 or W-164. For DIN track, specify DT and length of track desired (in 2.5 centimeter increments). For example, DT-10 designates DIN track 10 centimeters in length. Dimensions are ± .10 cm.
Fuse blocks, knife switches and WH Type terminal assemblies are the same width as two-pole W modules and therefore require twice the space of a single pole W.

How to Order

Types H and BT terminal blocks are ordered by listing a model number made up of the model designation followed by the number of terminals required for the application.

Example: a 10-pole terminal block becomes H-10 or BT-10

When ordering combinations of both types, the model number is made up of both model designations followed by total number of poles and number of each type. A composite of three H terminals followed by two BT terminals thus is converted to stock number HBT-5 (3H, 2BT).

**How to Order**

Types T and U terminal blocks are ordered by listing a composite number made up of the model designation followed by the number of terminals required for the application.

Example: a 4-pole terminal block becomes T-4 or U-4

When ordering combinations of both types, the composite number is made up of both model designations followed by total number of poles and number of each type. A composite of two T terminals followed by two U terminals thus is converted to stock number TU-4 (2T, 2U).

Combining these types with types L, O, S, H and BT would follow the same ordering format. (Note: When combined with types H or BT, a special adapter is required.)

How to Order

Types L, O and S terminal blocks are ordered by listing a model number made up of the series designation followed by the number of terminals required for the application.

Example: a 4-pole terminal block becomes L-4, O-4 or S-4

When ordering combinations of both types, the model number is made up of both series designations followed by total number of poles and number of each type. A model number of two L terminals followed by two O terminals thus is converted to stock number LO-4 (2L, 2O).

RELAY SOCKETS

Snap-In Socket Assemblies
CUS Series
RS Series
Snap-In Socket Assemblies

Features:
• Permanent-numbered terminals for easy identification
• New unitized, thermoplastic sockets with closed-back design which eliminates panel insulation, and resists breakage
• Nickel-plated screw-type terminals on break-resistant barrier-type terminal block for fast, easy connection. Screw-type terminals on other models with captivated wire clamps to eliminate lugging.
• Compact, printed circuit design
• Glass epoxy G-10 printed circuit boards
• Relay sockets can be spaced out in track for convenient insertion of marking strips, for relay identification
• High-quality sockets for maximum relay retention and electrical conductivity

Track

- Assemblies snap in and out without disturbing adjacent units (except for dovetail design on CUS5, 12, 14, 15, and 16)
- Lengths up to 48” – holds up to 30 socket assemblies
- Pre-punched track minimizes mounting time. (On lengths of 48”, drilling and tapping is only required for two or three mounting screws instead of two holes per socket.)
- Wide center channel provides space for under-board components. Allows greater surface area for easy mounting with adhesive tape.
- Grey PVC thermoplastic, UL flame class 94V-0, suitable for ambient temperatures up to 50° C.
- Vertical rib track provides support to prevent PC board breakage—supplies spring retention and electrical base insulation.
- Optional snap-on end retaining clips available for long vertical mounts or extreme vibration if end socket assembly is not mounted with screws.
- Available in three popular widths for maximum circuit design flexibility.
  - TR1 for 2-3/16” board or socket
  - TR2 for 2-3/4” PC board or socket.
  - TR3 for 3-1/4” PC board or socket

HOW TO ORDER
Relay socket assemblies can be ordered in parts form (assemblies and track separate) or factory assembled in specific length units. When ordering factory assembled units, specify type — number of sockets in continuous one-piece precut track; for example, order RS8-17 for a track containing 17 RS8 relay socket assemblies.
* Many Curtis Socket Assemblies are recognized under the Components Program of Underwriters Laboratories, Inc. under file No. E59934. These units are marked with a ☑ on the following pages. Socket Assemblies listed by Canadian Standards Association are marked with a ☐ and are covered by Report No. LR19623.
